

Welcome to the INCF Networking Social Event - The Era of Sharing in Neuroscience

Monday 4th July 2016: 19.15-22.00

Welcome to the INCF Networking Event!

This is a great opportunity to meet scientists interested in neuroinformatics and data/code sharing. INCF (International Neuroinformatics Coordinating Facility) will present updates about data and code sharing initiatives, including sharing clinical data, from the INCF international network. You will have the opportunity to connect with other researchers within and beyond Europe.

19.15 Networking reception with presentations

Topics:

- > Data sharing: whether time-series, images, or pharmacological, data sharing is becoming more and more important.
- > Code sharing: both to enable other researchers to replicate analyses, and to enable the same tools to be applied to different datasets.
- > Sharing clinical data across and beyond Europe (using the European CENTER-TBI traumatic brain injury project as an example)

Co-chairs:

Linda Lanyon, INCF Executive Director, Sweden

Leslie Smith, INCF UK Node, Sterling Univ, UK

Speakers:

Stephen Eglon, Univ of Cambridge, UK

David Menon, Univ of Cambridge, UK

Daisuke Miyamoto, University of Tokyo, Japan
