

Evening pub talks and science speed dating

3 July 2015, 20:00 - 22:30

Accompanying the FENS Forum and starting in Copenhagen in 2016, the FENS-Kavli Scholars organises talks for the general public in informal settings. Our aim here is to share our fascination with the brain, and to showcase the most interesting areas of Neuroscience for lay audiences in a fun way.

All talks start at 8 pm and will be followed by free discussions. No registration required.

Programme

Talk title: ***Dementia research: Illuminating brain changes***
